

Aplix and Quanta Form Partnership for 3G Java™ Solution

TOKYO, JAPAN –June, 2, 2006 – Aplix Corporation (TSE: 3727), the global leader in deploying Java technology in mobile phones, announced today that its JBlend™ Java platform has been selected by Quanta Computer Inc. (RIC: 2382.TW) (Quanta) as their preferred Java solution on Qualcomm's platform targeting US and European operators markets.

Aplix has a very comprehensive Java roadmap, especially with regards to advanced Java requirements from different 3G operators. With the JBlend on BREW® pre-integration announcement last year, Aplix's comprehensive 3G roadmap, along with the pre-integrated version of JBlend, will bring a faster time-to-market advantage to Quanta with cutting edge Java features to meet the most complicated operators' specifications in the world.

"This is a defining moment where Quanta has turned to Aplix to maximize the Java performance on 3G for its mobile phones" said Wesley Kuo, President and CSO of Aplix Corporation. "I am pleased that we have completed a successful technical evaluation previously, and now moved to a phase of an official partner relationship."

The two companies have already initiated development projects and anticipated the first Quanta handset to debut in the market later this year.

As the first-to-market enabler, Aplix has been trusted by global operators and handset manufacturers to fulfill their Java needs. The JBlend platform has already been deployed on over 200 million mobile devices around the world. Aplix continues its innovative efforts to contribute to the development of consumer products that are even more appealing and easier to use than those we have today.

About Aplix Corporation

Aplix Corporation is the global leader in deploying Java technology in mobile phones. Aplix was first established in 1986 and has been a Sun Java licensee since 1996. Aplix was publicly listed on the Tokyo Stock Exchange (Mothers) in 2003. On August 24, 2004 Aplix and the Taiwan based company iaSolution finalized the integration of the corporations.

Headquarters: Tokyo

Other offices: San Francisco, Munich, Taipei, Shanghai, Beijing, and Seoul
