

iaSolution to Support Datang Mobile to Evolve China's TD-SCDMA Java™ Platform for Mobile Phones

Beijing, China –December 7, 2006 –

Beijing, China—December 07, 2006—iaSolution Inc. announced today that it has officially become the first consortium member of Arena™ Community, the TD-SCDMA 3G Terminal Service Community led by Datang Mobile, in the Java™ ME Application Platform Technology domain.

Arena Community is an open community focus on interoperability and conformity of end user experience issues in TD-SCDMA network. As a member of the community, iaSolution can leverage its global experience and leading position in China market to assist Datang Mobile to establish a win-win yet sustainable Java ecosystem among wireless operators, handset manufacturers and application developers to reduce the time-to-market and total cost of introducing innovative data services or products.

“With our solid experience in supporting various global operators on the different 3G technologies (e.g. WCDMA, CDMA2000, etc.) to enable their Java ecosystem,” said Wesley Kuo, President and CSO of Aplix Corporation, “we are very glad about the alliance with Datang Mobile as we believe our unique set of capabilities can support Datang in running a successful and high quality Java technology deployments based on China's own TD-SCDMA standard”

As the global leader in wireless Java technology, iaSolution has been working closely with global major operators to define tailored specifications and to develop related testing tools. It enables handset manufacturers and content providers to easily deploy operator compliant applications and contents. It is believed that the organic integration between Arena platform and JBlend™ can provide a very good synergy to support the development and maturity of 3G data services in China in near future.

About iaSolution Inc.

Established in 2000, iaSolution has committed itself to becoming the partner of choice in Asia Pacific as the wireless communication software solution provider that continuously creates values for customers and partners through superior knowledge and technologies. To realize this goal, iaSolution focuses on developing embedded software for wireless devices and application platforms for wireless services to help customers and partners to provide value-added services via wireless devices.
