

## **Aplix delivers Java™ terminal test suite to China Mobile**

Tokyo, Japan – May 1, 2009 –

Aplix Corporation (TSE: 3727) announced today that iaSolution Inc., an Aplix company, has completed the development of the Java™ terminal test suite for China Mobile Communications Corporation. This test suite, China Mobile Extension Test Suite 4.1 (CETS 4.1), is compatible with China Mobile Java specification 4.1 and demonstrates Aplix's outstanding expertise on Java technology and its commitment to drive the evolution of the mobile industry in China.

Aplix, a world leader in delivering software innovations, has been cooperating with China Mobile since the development of China Mobile Extension Test Kit 3.0 (CETK 3.0) in 2005, and later helped define its Java specification 4.1 in 2007. In 2008, the company was chosen as China Mobile's exclusive partner for the development of CETS 4.1. CETS 4.1 consists of test cases for verifying whether a mobile terminal meets the requirement of China Mobile Java specification 4.1, and a test server for releasing test cases, collecting test results, and creating test reports. China Mobile has announced CETS 4.1 to handset manufacturers and targets official operation in the middle of 2009.

With proven experience in enabling Java on China Mobile's numerous co-branded handsets and supporting the successful implementation of CETS 3.0, Aplix will continue to work closely with handset manufacturers to bring more advanced Java features and services to the market.

Through its presence in China, Aplix has brought its global experience and expertise to Chinese operators, mobile manufacturers, and platform partners, and will continue to leverage its increasing and dedicated resources in the region.

### \*About Aplix Corporation

Aplix, a world leader in delivering software innovations offers solutions for consumer electronics that enable new services and enrich the end user experience.

Aplix has been a pioneer in providing software solutions that have dramatically enhanced the capability of consumer electronic products. Aplix enabled one of the most successful wireless content businesses in Japan, and its solutions are powering audio visual equipment and mobile devices for companies such as Motorola, Panasonic, Samsung, Sony, NEC, and HTC.

# Aplix Press Release

Aplix's technology has been shipped on over half a billion devices globally as of December 2008, with over 30,000 games and contents specifically created to be deployed on its innovative technology. The company works closely with global wireless operators including China Mobile, China Telecom, NTT DoCoMo, and Vodafone to deliver next generation services on existing and new devices.

Aplix continues its commitments to software development and enabling a successful content and services market. With our innovations, we add value to application developers and bring life-enhancing consumer electronic devices to millions of people worldwide.

Headquarters: Tokyo

Other offices: San Francisco, Munich, London, Taipei, Shanghai, Beijing, Seoul, Yokosuka, and Okinawa
